ABOUT THE STATE.

Items of Interest Gleaned From Our
Exchanges.

An interesting sight in East Char-
lotte is Master Earl Ellison driving a
five-month-old Guernsey calf harnessed to a sled.

The body of Bert Crossman, son of
L. A. Crossman, of Brandon, who was
killed by a train in Ohio, where he was
employed as a brakeman, was brought
to Brandon for burial.

James B. Cahoon, a retired ensign of
the navy, who died at New Rochelle, N. Y.,
Sunday, was born in Lyndon, and had
resided in New Rochelle since his
retirement seven years ago. He was re-
tired because of poor eyesight.

Gen. and Mrs. F. G. Butterfield and
daughter, Esther, of Derby Line, ex-
pected to leave home February 23 for
southern California. They will pass
the remainder of the winter there, go-
ing first to Los Angeles where they have
a winter home.

Benjamin Stokes, of Starkboro, who
went to Middlebury Wednesday to be
examined for an increase of pension,
not Myron L. Fales, of Middlebury,
whom he had seen for more than
forty-two years, when both were in
133by Prison in 1864, as prisoners of war.

George D. Leonard has presented
Cummings Post, W. R. C., at Hine-
bury, a gavel made of wood taken from
Libby Prison. The mallet head is in-
scribed on the side with the name of
the donor and the date January 12,
1907, and on the other with the fact
that the material was from the old
prison.

Robert M. Collins, who was gradu-
ated from Middlebury college in the
class of 1889, has been appointed head
of The Associated Press London office,
and also a member of the Royal
Geographical society of London, an
honor that comes to but few Americans.
He was chief Associated Press corres-
pondent in the Philippines and was the
first newspaper correspondent through
the breach in the walls at Peking.

Mrs. Della Parrott Bacon, of Essex,
who has been married forty-two years,
has brought suit for divorce from her
husband, Edward Bacon, on the ground
of intemperance and cruelty. Bacon
asks that a portion of all the property
be decreed to her by way of alimony;
that he be enjoined from interfering
with her personal liberty and from
selling or encumbering the property;
and for permission to resume her
maiden name.

Sumner E. Darling, of Hardwick, a
member of the class of 1909 in Tufts
college, has been elected on a team
to represent Tufts in a debate with
New York university on the question
"Resolved, That all nations should
agree that they will not intervene in
the affairs of other countries for the
forcible collection of public debts due
to their citizens. It is understood that
this rule should apply to debts in
existence at the time of its adoption."
Tufts will take the affirmative side,
Premises W. Towley, 1901, of Wash-
ington, has been chosen on the team
which will debate against Clark col-
lege.

At the end of a big hall one of the
guests went into the cloak room at 3
o'clock in the morning to put on his
things, and the attendant came for-
ward with a coat.
"That isn't my coat," said the guest.
"Mine is a perfectly new coat."
"A new one? Oh, I hadn't any new
coats left after half past 12," La-
Saurie.

First Come, First Served.
At the end of a big hall one of the
guests went into the cloak room at 3
o'clock in the morning to put on his
things, and the attendant came for-
ward with a coat.
"That isn't my coat," said the guest.
"Mine is a perfectly new coat."
"A new one? Oh, I hadn't any new
coats left after half past 12," La-
Saurie.

Free to Farmers.
To any farmer who will write for
postpaid, blank form for getting a
first-class fertilizer at home, together with
the cost of ingredients, directions for
mixing, etc.

The Vermont experiment station in
its bulletin No. 316 has the following
to say with reference to the value of
home mixed fertilizers, as compared with
the ordinary commercial brands: "On
every account, however, financial, educa-
tional, agricultural, it is better to buy
the crude stock and home mix if one
uses a ton or more."

All up-to-date farmers should be in-
terested in the subject of home mixed
fertilizers and we are in a position to
help them. Address: Carroll S. Page,
Hyde Park, Vt.

Notice to the Public.
C. C. Rollins, who has been in the
employ of the Morrison farm is no
longer employed by them from this date
February 19.

B. M. Suto, Supt. of Morrison farm.

KILL, ROB, AND FLEE IN CABS

Warsaw Terrorists Slay Post-
master and Four Others

AND RIFLE POSTOFFICE

Daring Attack Made at Noon, Safe Was
Robbed, Bystanders Were Shot, and
the Thieves Fled in
Cabs.

Warsaw, Russian Poland, Feb. 23.—
The postoffice on Wapolska street was at-
tacked at noon yesterday by a band of
terrorists, who shot and killed the post-
master, two clerks and two soldiers who
were guarding the office, and wounded a
cashier and a bystander.

The terrorists robbed the safe of the
cash and stamps, and escaped in cabs.
The robbers, who belong to the fight-
ing Socialists, displayed a red flag while
making their escape.

The postoffice authorities admit that
the robbers secured several thousand
rubles. This was the first important
raid in two months, and shows that the
terrorists were not suppressed, as was
claimed.

The incident has caused intense ex-
citement here, and arouses fears of a
recurrence of the sanguinary events of
the early winter.

**WOULD OUST NEBOGATOFF'S
OFFICERS FROM CZAR'S ARMY**

Council of Baltic States Hostile to Even
the Acquired Men.

St. Petersburg, Feb. 23.—The council
of naval officers of the Baltic states has
adopted a resolution against the
retention in the service of the officers of
Vice-Admiral Nebogatoff's "squadron,"
who were acquitted by the court-martial
which tried them on the charge of sur-
rendering to the enemy at the battle at
the sea of Japan, for which the admiral
was sentenced to ten years, and others to im-
prisonment for varying terms.

Admiral Nebogatoff, chief of the naval
staff, has transferred the officers in ques-
tion from their ships to shore duty at the
admiralty here.

A NEW CLOVER

A Plant From the Black Soil of Russia
Recommended as Forage

The bureau of Plant Industry has
been experimenting with a new form of
red clover which came from the black
soil region of Russia. The plant is prac-
tically hairless and therefore does not
hold dust like the common red clover.

For this reason it is believed that it
will make a better forage plant for
horses, since it will be much less likely
to cause heaves and will be clearer and
more convenient to handle. Blooming
in cattle is perhaps due in part to the
presence of hairs on common clover.

If this be true the trouble would be
obviated by feeding them the new hair-
less Clover.

Another objection to the common red
clover is that it matures much earlier
than Timothy with which it is usually
sown. It is thus impossible to harvest
the mixture at a time when the full
value of both the clover and Timothy
can be obtained.

The new red clover matures two
weeks later than the common red kind,
or at the same time with the Timothy,
and at a season when the farmer's at-
tention is not so imperatively demanded
for his corn, and also at a time when
the most of the clover belt the weather
is more favorable for harvesting
the crop without injury by rain.

Quebec Laws Burn in \$100,000 Blaze.
Quebec, Ont., Feb. 23.—The building
and plant of the Daily Telegraph was
burned yesterday. All the English print-
ing for the provincial legislature was
burned. Loss \$100,000, insurance \$38,
000.

How's This?

We offer One Hundred Dollars Reward for any
case of a rash that cannot be cured by Hall's
Cathartic Cure.

We, the undersigned, have known F. J. Che-
ney for the last 15 years, and believe him per-
fectly honorable in all business transactions,
and financially able to carry out any obligations
made by him.

WALDO KINNAN & MARTIN,
Wholesale Druggists, Toledo, O.
Hall's Cathartic Cure is taken internally, acting
directly on the bowels and mucous surfaces of
the system. Testimonials sent free. Price 75
cents per bottle, sold by all druggists.
Take Hall's Family Pills for constipation.

Hunting for Trouble.

"I've lived in California 20 years and
am still hunting for trouble in the way of
scurvy, sores, wounds, boils, cuts,
sprains, or a case of piles that Bucklen's
Arnica Salve won't quickly cure,"
writes Charles Walters of Allegheny,
Sierra county. No one hunting Mr. Wal-
ters; it cures every case. Guaranteed at
Red Cross pharmacy. 25c.

KEEP YOUR HEAD UNCOVERED.

The Constant Wearing of a Hat Pro-
pogates Dandruff Germs.

There are many men who wear their
hats practically all the time when awake,
and are blessed with a heavy shock of
hair; yet if the scalp of these men men-
once become infested with dandruff
germs, the parasites will multiply all
the quicker for lack of air. Baldness
would ensue as the final result. New-
bro's Herpicide kills these germs and
stimulates unhealthy hair to abundant
growth. Herpicide is a pleasant hair
dressing as well as a dandruff cure and
contains not an atom of injurious sub-
stance. Sold by leading druggists. Send
10c. in stamps for sample to The Herpi-
cide Co., Detroit, Mich.

Two sizes—50 cents and \$1.00.
E. A. Brown, Special Agent.

ROUGH LAND.

Treatment of Foul and Rocky Pastures
in New England.

What to do with foul, rocky pastures
is a problem which grows more puz-
zling every year. Mowing the bushes
only puts off the evil day.

The land is too rough for the plow,
and clearing away the stones to make
tilage land would cost too much at
present prices of land and labor. One
farmer informs us that to reclaim his
pasture free from stone cost \$100 per
acre, while land equally good and
ready for the plow cost only \$60 per
acre.

Some English Methods.
It is as yet a question, states Amer-
ican Cultivator, whether it will pay to
top dress our average New England
farms in order to restore the pasture
crop. Success has been attained in re-
storing English pastures by use of
slag meal and sometimes with potash
salts also. The use of these and other
chemical fertilizers has not been ex-
tensively tested in this country. It is
a rather expensive process, and as
there is less moisture in this climate
pasture grasses do not respond so
readily to top dressing.

Plant Food.
The wild growth and moss come on
chiefly because the soil has become too
poor to support grass and clover. The
problem is how to restore the plant
food at a price within the reach of the
landowner. It requires nerve to apply
chemicals that cost as much per acre
as the land is worth in its present con-
dition.

Sheep and Fruit Trees.
Heavy stocking with grain feed sheep
will kill out the rubbish, and such a
plan affords the best solution where
dogs are not too numerous. Apple
trees, sugar maples and nut trees will
occupy thousands of acres, but when
all has been done there will remain
large areas unfit for any use but the
growth of timber, for which purpose
they never should have been diverted.

CALF SCOURS.

The New Remedy—How it is Used by
Dr. Klein of South Carolina.

As pointed out by L. A. Klein of
the South Carolina experiment station,
one of the most common difficulties
met with in raising calves on skim
milk is the persistent form of diar-
rhea commonly known as calf scours.
This disease is due to the action of
various fermentative and putrefactive
bacteria in milk. The inevitable result
of carelessness in handling milk is the
development of large numbers of bac-
teria in it, and this in turn leads to
an unhealthy condition in the calf and may
often produce death. Proceeding on
the basis of the results of investiga-
tions already made by others on the
influence of formalin on disease germs
and on digestion, when administered
in small amounts in milk, Dr. Klein
treated twelve milk fed calves affected
with scours by adding formalin to the
milk in the proportion of one part to
4,000 parts of milk. This dilution may
be readily obtained by pouring five
teaspoons of a one ounce of formalin into
fifteen and five-tenths ounces of water.
From this stock solution one teaspoon-
ful is added to each pint or pound of
milk to be fed to the affected calf.

From the experiments it appeared
that the results are practically the
same whether the formalin solution is
placed in the milk just before feeding
the calf or immediately after the skim
milk is received from the separator.
Apparently, however, it was advisable
to add the formalin to the milk im-
mediately after separation.

Of the twelve calves treated in this
way eleven recovered without any
further treatment—seven of them on
the second day, three on the third day
and one on the ninth day. If further
tests show that formalin causes no in-
jury to calves, this method may furnish
an effective means of controlling
scours.

Items in Chestnut Culture.
We are glad to say that we have never
seen a chestnut tree infested with
San Jose scale. For this reason if for
no other we would rather plant chest-
nuts than any other variety of decid-
uous trees. Please do not understand
the writer to say that the chestnut tree
has ever against this worst pest that
has ever visited our fair land. For the
chestnut weevil there are several rem-
edies suggested. Growing chestnuts in
the poultry yard under the keen eye of
the old hen is absolute protection. I
am speaking from experience. The
hen seizes the grub as soon as it
bore through the fallen nut and be-
fore it can enter the ground. Nature
has prompted this grub to vacate the
nut as soon as it feels the shock of the
fall to the ground.—J. Albersson, New
Jersey.

Consumption Not Hopeless.
A little book on this subject has recently been
issued by the American Lung Association, 120
Broadway, New York, N. Y. It is a
booklet on "Consumption Not Hopeless."
It tells some very interesting and startling things
